

# Exciting New Programs Available in Burlington

## Psychological & Rehabilitative Services

In May of 2018 the Burlington Family Health Team was provided funding from the Ministry of Health and Long-Term Care to offer two new community-based programs to the patients of family physicians in Burlington.

We are pleased to announce that these programs are now accepting referrals. Our **Burlington Access to Psychological Treatment** provides psychotherapeutic support for adults 18+.

Our **Burlington Community Access to Rehabilitative Services** offers services for musculoskeletal conditions for adults 19+ by a team of physiotherapists and kinesiologist.

*For more information on these two new programs please click [here](#).*
